- 6) ☐ Other:

Upon reconsideration, an action on the merits of both inventions follows.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Harrawood et al or Brenner et al (note figure 7).

The head end foot ends of Harrawood are arbitrary designations, as a patient can be positioned with the head at either end. Both of the above references may be used for "urological" positioning.

Claims 5, 6, 7 are rejected under 35 U.S.C. 102(b) as being anticipates by Brenner et al.

Brenner et al's device may be used for "urological", positioning.

Claims 8-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Kuphal et al. (note elements 2, 5, 6),

Mattern, Sicek et al, and Heinold et al, are cited as relevant art.
